Hey, i'm on this puerto rico call where we are discussing all puerto rico sites. Cabo Rojo came up and they said they sent the entire draft SOW to EPA and it should currently be under review. I explained to them that we only received Section 4 and some figures. Courtney said we should be discussing this with Denise because "she is on our floor..." However, I did bring to light that we haven't had this document and Courtney said she will discuss with this Angela and CDM said they will ensure that we receive the full document soon or at least have access to it via the eroom.
